## RISE PA GRANT FUNDING AVAILABLE!

A new energy grant program just dropped – your solar project could now qualify for funds to cover up to **30% of the total project cost, up to \$20 million.**

A “**One-Time-Only**”, first-of-its-kind program, RISE PA (Reducing Industrial Sector Emissions in Pennsylvania) was awarded a massive **\$396 million** from the U.S. Environmental Protection Agency to help industrial businesses make the switch to solar.

With grant funding covering **up to 30% of your solar project** and the ability to stack with other state and federal incentives, your business could see **80% or more of your solar project costs covered.**

Coral Reef can help you break down how RISE PA and other incentives can benefit your business, answer your questions about solar adoption and cost savings over time and support your business from application to solar installation.

Applications are open through **August 29**. Contact us now to get your application started!

## MAKING CONNECTIONS AT PASBO 2025

Coral Reef’s Business Development Team recently attended the annual PASBO (PA Assn of School Business Officials) Conference at the Hershey Lodge, where they connected with school leaders and energy officials to discuss the benefits of solar for schools and the wide range of incentives available to support it.

## PROJECT UPDATES

### Adamstown Solar: 2.6 MW Ground Mount

Adamstown, MD

Together with our partners at Nexamp, the Adamstown Community Solar Project is **complete!** This project supplies clean energy to the Potomac Edison utility grid, allowing local residents and businesses to join the Nexamp Community Solar program and reduce their annual electricity costs.

### Lansing Community Solar: 6.1 MW Ground Mount

Lansing, NY

From Matt Abbott, our Senior Project Manager onsite:

"The site is at about 95% complete on racking, 25% on module install, and are planning to be **ready for energization this summer!**"

Jon Pribble is running the show onsite keeping crews on track and busy while battling muddy conditions on the farm field from the winter's thaw. Crews are looking forward to wrapping the site up in the warmer weather!"

*\*Development Partner: Genie Solar Energy*

## WELCOME NEW TEAM MEMBERS!

In less than two months, Coral Reef brought on **30 new team members** across all departments—from **electricians and solar installers to project managers and quality technicians**. This a clear reflection of how quickly we're growing— it means faster timelines, more dedicated support, and better capacity to take on complex projects with confidence. As we grow, our partners (that's you!) reap the benefits—like a ready, experienced team that knows how to get things done.
