Mifflin County School District
4.2 MWdc Ground Mount

REAP GRANT EXTENSION

- Following the September 30 application deadline, an additional **\$600 million** was added to the REAP program budget.
- The next round of applications are due **December 30th**.
- REAP went through \$700 million just last year, so we do not expect this funding to last for much longer.
- Combined with State and Federal incentives, a REAP grant means your project would be almost entirely paid for.

PA SOLAR FOR SCHOOLS

- The PA Solar for Schools \$25 million grant program is in its pilot year.
- Based on qualifying criteria, the grant could subsidize up to 50% or \$500,000 per project.
- Applications are open through **January 31st, 2025** and will be reviewed/approved on a rolling basis.

BAD NEWS ABOUT YOUR POWER BILL...

Due to power plant retirements, increased load and new market rules, the PJM Interconnection capacity costs will leap from **\$2.2 billion to \$14.7 billion** for the 2025/26 delivery year. Starting **June 1, 2025**, you will see a significant increase in your power bill.

Contact our Development Team for an updated solar proposal and cash-flow analysis.

RECENT PROJECTS & NEW HIRES
